

ModCon HR — Client Walkthrough Guide

Login credentials & feature walkthrough for demo/UAT

1. Login Credentials

Name	Email	Password	Role
Sumanth Bolla	sumanthbolla97@gmail.com	ModconAdmin#2026	Admin
Sai Krishna Koppaka	saikrishnakoppaka@gmail.com	Set on first sign-up	Admin
Riya Sharma	riya.sharma@modconhr.test	Employee@123	Employee
Arjun Mehta	arjun.mehta@modconhr.test	Employee@123	Employee
Priya Nair	priya.nair@modconhr.test	Employee@123	Employee
Karan Verma	karan.verma@modconhr.test	Employee@123	Employee
Neha Gupta	neha.gupta@modconhr.test	Employee@123	Employee

Security note: The two admin emails are permanently fixed as Administrators in the application code — this cannot be changed by any user through the UI. All other accounts default to the Employee role and can be promoted/demoted by an Admin from the Admin Dashboard. Please change the admin password after your first login.

2. How to Sign In

1. Go to the application URL (provided separately once deployed on Vercel).
2. Enter one of the email/password combinations above.
3. Click **Sign In**. New team members can click **Sign up** to self-register (they will default to the Employee role).

3. What Admins Can Do

- Everything an Employee can do, plus:
- Access the **Admin** section in the sidebar (Employees only see modules relevant to them).
- View total users, admin count, employees on record, and open job postings at a glance.
- Promote any employee to Admin, or demote/remove them (except the two fixed admin accounts).
- Post job openings, run payroll, approve leave/expense/regularization requests.

- Manage company Settings — departments, leave policies, holidays, roles, integrations, billing.

4. What Employees Can Do

- View their dashboard with a personalized greeting.
- Apply for leave, submit expense claims, raise helpdesk tickets.
- View attendance, payroll, onboarding checklist, and performance goals.
- Cannot access the Admin Dashboard or change other users' roles.

5. Module Walkthrough

Dashboard — Overview, KPIs, pending approvals, announcements

Attendance — Daily attendance, mark attendance, regularizations

Payroll — Run payroll, payslips, salary cost by department

Onboarding — New hire checklists with task tracking

Expenses — Submit claims, approve/reject, category breakdown

Helpdesk — Raise and track IT/HR support tickets

Settings — Company profile, departments, policies, database

Employees — Directory, org chart, employee profiles

Leave — Apply, approve/reject, balances, holidays

Recruitment — Post jobs, candidate pipeline

Performance — Goals/OKRs, performance reviews

Assets — Add assets, assign/reassign to employees

Reports — Workforce analytics, exportable reports

Admin Dashboard — User & role management (Admins only)

6. Suggested Demo Flow for the Client

1. Sign in as **Admin** (sumanthbolla97@gmail.com) — show the Admin Dashboard and user management.
2. Post a new job opening in Recruitment.
3. Approve a pending leave request and expense claim from the Dashboard.
4. Run payroll for the month in Payroll.
5. Sign out, sign in as an **Employee** (e.g. riya.sharma@modconhr.test).
6. Apply for leave and submit an expense claim as the employee.
7. Show that the Employee cannot see the Admin section or access `/admin` directly.
